

Healthcare Privacy Collection

Equip your employees to protect health information with Broadcat's practical—and completely customizable—communication and training tools. The global-friendly materials in this collection work both online and offline to help you cut through the clutter and meet employees where they are.

STARTER PACK

Is this health information?

This infographic helps employees understand what to keep secure by outlining the types of health information they may come across.

Health information takes many forms!

This graphic reminds healthcare workers that patient information can be collected in a variety of ways and to keep it safe.

Do I need consent to use health information?

Use this infographic to help employees understand when consent from a patient may or may not be needed to use their info.

HIPAA, not HIPPA

Use this graphic to remind healthcare workers what HIPAA stands for and how to get answers to their questions.

Handling health information?

This infographic introduces patient information definitions and covers the DOs and DON'Ts to keep health info secure.

Keep health information secure

Use this graphic to remind employees how to keep information secure when leaving their workstation.

Keep, move, or discard it?

This decision tree helps your people determine if printed patient information should be kept, secured, or destroyed, and how.

Destroy Health Information Securely

Use this graphic to remind your teams how to discard and destroy paperwork that contains health information.

How to protect our data from imposters

This infographic highlights who scammers are likely to impersonate, the falsified documents they use, what information to ask for.

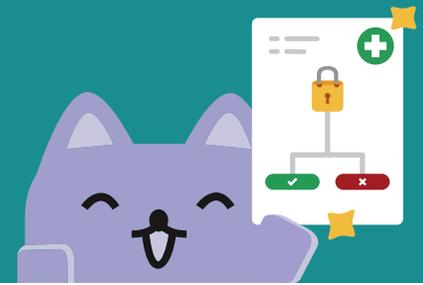

Protect patient privacy

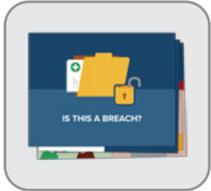

This graphic emphasizes the importance of protecting health information to avoid loss of patient trust or fines.
